< 유의 사항 >

- 문제지 쪽수와 인쇄상태를 반드시 확인하십시오.
- 선다형 26문항(1~26번)입니다.
- 답안지에 학년, 반, 번호, 이름을 정확히 기입·표기하십시오.
- 정답에 해당하는 번호에 컴퓨터용 사인펜으로 표기하십시오.
- 연필이나 빨간색 펜 등으로 예비마킹을 절대 하지 마시오.

1. 다음 대화에서 Dr. Hill이 설명하는 주제로 가장 적절한 것은?

[3.2점]

Host Welcome back to *Today's Health*. Today we're going to be talking about exercise. Dr. Victoria Hill is here, and she is going to share some useful tips. So, Dr. Hill, let's start with a question about my experience last month. I worked out right after dinner and got a stomachache. Why did that happen?

Dr. Hill Well, the problem is that you exercised too soon after eating. This can cause various stomach issues. When you eat, blood rushes to the digestive system to help break down the food and absorbs its nutrients. But when you start to exercise, blood moves from the digestive system to your muscles. This happens in order to supply your muscles with the oxygen and nutrients that they require. As a result, the digestion process is paused until the blood returns. So, whether you're lifting weights or going for a jog, you shouldn't do it with a stomach full of food.

- ① 식사 직후 운동하면 안되는 이유
- ② 운동 직후 먹으면 살이 찌는 이유
- ③ 식후 배가 아플 때 하면 좋은 운동
- ④ 건강을 위해 가져야 할 좋은 습관들
- ⑤ 근육량을 늘리기 위해 섭취해야 하는 영양소

2. 다음 글의 주제로 가장 적절한 것은? [3.6점]

Project leaders should not be surprised when disagreements emerge within the team. In fact, they should expect them. If they remain hidden, the leader may even want to seek them out for at least two reasons. First, different views can bring with them good ideas about the project and how it might be run. Although snap decisions about project changes should be avoided, leaders should be open to new and better ways to run the project. /Second, when conflicting viewpoints are found, they are more easily resolved earlier rather than later in the project. Although team members may disagree about one or another aspect of the project, most simply want their ideas considered and resolved. The team tends to look to the project leader to play the lead role in resolving differences, and members will generally defer to the leader if they believe their views have been given due consideration.

*defer to: ~에 따르다

- ① the way leaders build a frictionless team from the start of a project
- ② the necessity of actively seeking and resolving team disagreements
- ③ the reason why team members' silence is not inferred as their full agreement
- ④ the psychological burden of leaders who always want themselves understood by team members
- ⑤ the danger of assuming that just because team members defer to leaders, it implies a successful project

3. [3.6점]

Vision is our dominant sense, and you want to look both ways before crossing the street — it's the first thing parents drill into their children. But that doesn't mean our sense of hearing isn't a big deal. I don't have to mention the worn-out example of cavemen and hidden saber-toothed tigers. There's something that can sneak up and kill you today: a silent electric car. These pose an unanticipated but serious threat to pedestrians and bicyclists, who depend on engine noise to detect and orient to cars — so much so that the National Highway Traffic Safety Administration now requires slow-moving electric vehicles to generate a warning noise. It's a reminder that even for us in a modern city, having both cues can mean the difference between life and death.

*saber-toothed: 검 모양의 송곳니가 있는

- ① Surprising Development: Noiseless Electric Cars
- ② Road Noise! Things We Can Do to Eliminate It
- ③ Traffic Safety: Look Around Carefully at Crosswalks
- ④ Reasons We Are against the New Traffic Regulations
- ⑤ Crucial Partner Roles in Road Safety: Sight and Sound

4. [3.6점]

Sometimes traditions may change or appear to end because of convenience or changes in taste. For example, to make a pumpkin pie, a cook used to have to first find a pumpkin of suitable size, cut it, peel it, cook it, and mash it, all before combining it with other ingredients and pouring the mixture into a crust. Now, cooks may choose to use canned pumpkin from the supermarket and cut out a great deal of labor and time. Another changing food tradition is that many families no longer make refried beans by cooking them in lard and choose instead to use vegetable shortening. Perhaps this change came about because the family has come to prefer the taste of beans without lard, because concepts of healthy cooking have changed, or because someone in the family has heart disease or high cholesterol.

*lard: 돼지기름 **shortening: 쇼트닝(제빵 등에 쓰이는 기름)

- ① The Secret to Making a Delicious Pumpkin Pie from Scratch
- ② The Hidden Dangers of Traditional Ingredients: Focus on Lard
- ③ How Modern Technology Has Completely Displaced Labor in Kitchens
- ④ Modern Kitchens, Altered Traditions: The Evolution of Food Preparation
- ⑤ Why Canned Food at the Supermarket Is Losing Its Popularity Drastically

[5~6] 다음 밑줄 친 부분 중, 문맥상 낱말의 쓰임이 적절하지 않은 것을 고르시오.

5. [3.2점]

Today, many companies want to develop artificial intelligence. This technology helps them lead to ① success in the tech industry. Now, smart computers can analyze data very ② fast, and their speed is beyond imagination. Many people believe AI can ③ overcome limitations of humans and boost creativity. But there is a heated ④ controversy about AI. Some people worry that AI can pose a threat to our jobs. Also, if we use AI in a bad way, it can be ethically ⑤ correct. Therefore, we need to think about how to use AI safely.

6. [3.4점]

Many people go to the gym regularly to work out and stay healthy. ① Moderate exercise is helpful for maintaining good health by boosting overall energy. However, true lifestyle choices involve both physical activity and a balanced diet. Unfortunately, teenagers consume a lot of fast food these days. ② Excessive consumption of fast food can result in digestive problems because these meals often lack dietary fiber. Instead, our bodies need wholesome foods to function properly. Fruits and vegetables are ③ devoid of important nutrients. They contain key vitamins and complex carbohydrates that supply continuous energy to our daily lives. Eating these natural foods allows our bodies to ④ absorb vital minerals more efficiently. Ultimately, combining a nutrient-rich diet with regular exercise ⑤ ensures a strong body and a sharp mind.

[7~8] 다음 글을 읽고, 물음에 답하시오.

Example 1 Making Digital Images with AI

AI image generators create images based on our text requests. They do this by ㉠ copy other images that were created by humans. The generators have the ability to analyze millions of images and their corresponding descriptions. This enables them ㉡ create works of art in a short time based on the provided instructions.

(A) Moreover, AI programs can mix the styles of existing images upon request. (B) For instance, you can blend a photograph of a cat with Johannes Vermeer's Girl with a Pearl Earring. These two images have a few differences. (C) Therefore, the overall design, the eyes, and the scarf around the head are clearly based on Vermeer's painting. A simple request was enough ㉢ to create this complex and detailed image.

Example 2 Making Music with AI

AI programs may lead to changes not only in the art world but also in the music industry. These programs are already able to compose songs, and they give you many options. (D) For example, you can choose the style and key, such as C major or A minor. You can also set how long the song will be. Once you've entered the information, the program will produce a song ㉣ which you can edit or use as it is. (E) Furthermore, computer-generated imagery (commonly known as CGI) has opened up new possibilities in the music industry. Not only human singers but also virtual influencers with a highly realistic look ㉤ has already released several songs. Some of them have many followers on social media, just like human singers. These types of virtual musicians are able to speak and move realistically with the help of their human creators.

7. 위글의 흐름으로 보아, 밑줄 친 (A)~(E) 중 문맥상 그 쓰임이 어색한 것은? [3.4점]

- ① (A) ② (B) ③ (C) ④ (D) ⑤ (E)

8. 위글의 밑줄 친 ㉠~㉤ 중 어법상 옳은 것의 개수는? [4.4점]

- ① 1개 ② 2개 ③ 3개 ④ 4개 ⑤ 5개

[9~10] 다음 글을 읽고, 물음에 답하시오.

Many AI programs are open to the public, ㉠ that means they are free and convenient to use. However, these programs have sparked a debate over their impact on humans. Some people view AI as a threat because of the fact ㉡ that it can learn and perform skills better than humans. They worry ㉢ that AI will replace humans in more and more areas. There are also concerns ㉣ which AI may imitate the styles of human artists without their consent. On the other hand, others think that AI cannot exceed human imagination and that it is still dependent on human assistance. This is because the data ㉤ what AI uses can have flaws or limitations. A dependence on imperfect data with little diversity eventually limits the output of AI programs. Human imagination, on the other hand, has no limits or boundaries.

What kind of future do you think lies ahead of us? Not only ㉦ will people use AI programs to boost their creativity and productivity, but they will also grow tired of the limitations of AI tools. AI provides many benefits and new opportunities. What we need to do is figure out how to use AI tools ethically and think about how humans and AI can work together.

9. 밑줄 친 ㉠~㉦ 중 어법상 옳은 것의 개수는? [3.2점]

- ① ㉠, ㉡ ② ㉢, ㉣, ㉤ ③ ㉢, ㉣, ㉤, ㉥
④ ㉢, ㉣, ㉤ ⑤ ㉠, ㉢, ㉣, ㉤, ㉥

10. 위글의 내용을 다음과 같이 요약하려고 한다. 밑줄 친 부분 중 문맥상 적절하지 않은 것은? [3.2점]

AI programs are freely ㉠ available and offer many benefits, but they have also ㉡ brought about a lot of debate. Some people worry that AI may replace humans or copy artists' styles without ㉢ permission. Others believe that AI still has limitations due to its dependence on ㉣ flawless data. In the end, we need to focus on using AI tools ethically and finding ways for humans and AI to ㉤ collaborate.

[11~13] 다음 글을 읽고, 물음에 답하시오.

Host So, ① is it the loss of glycogen that cause us to have low levels of energy?

Dr. Hill That's correct. ② For this reason, doctors recommend that people eat food containing carbohydrates within thirty minutes after working out. This replaces the muscle glycogen that you have lost. ③ Basically, you need between one and one and a half grams of carbohydrates for every kilogram that you weigh. Let's do the math. If you weigh 60 kilograms, you should try to consume between 60 and 90 grams of carbohydrates after you exercise. This is (A) to about one bowl of white rice or three bananas.

Nutrition Facts

Amount	Food	Carbohydrates
1 bowl (200g)	white rice	62 g
1 banana (100g)	bananas	23 g
1 slice (25g)	white bread	14 g

Host That's very interesting. But what about eating before we exercise? ④ Can you explain how long we should wait after eating?

Dr. Hill Well, as I said before, exercising right after you eat will cause feelings of discomfort. ⑤ But, if you wait too long to exercise after eating, you'll suffer from a lack of energy. The best time to eat before you exercise varies from one to three hours. Basically, it (B) on several factors such as the type and amount of food as well as body size, age, and gender. The type of exercise also matters. For extremely active exercise like cycling, I suggest that you should wait between one and a half and three hours after eating a moderate-sized meal. But for something more (C), such as golfing, waiting for one hour after a meal should be enough. Clearly, you can wait less after eating a snack.

Host Thank you very much for this fascinating information, Dr. Hill. I'm sure it will be very helpful for all of our viewers.

11. 밑줄의 밑줄 친 ①~⑤ 중, 어법상 틀린 것은? [4.0점]

- ① ① ② ② ③ ③ ④ ④ ⑤ ⑤

12. 밑줄의 빈 칸 (A), (B), (C)에 들어갈 말로 바르게 짝지어진 것은? [4.4점]

(A)	(B)	(C)
① equal ...	focuses ...	luxurious
② indifferent ...	reflects ...	aggressive
③ essential ...	insists ...	dynamic
④ equivalent ...	depends ...	relaxed
⑤ proportional ...	impacts ...	affordable

13. 밑줄의 내용과 일치하지 않는 것은? [3.2점]

- ① 사용한 글리코젠을 보충하기 위해 30분 안에 탄수화물을 섭취하는 것이 권장된다.
- ② 글에 제시된 수식 70×1.5 로 계산하면 몸무게가 70kg인 사람은 운동 후 70~105g의 탄수화물 섭취가 적절하다.
- ③ 식사 후 너무 오랜 시간을 기다리는 것 또는 바로 운동하는 것 두 가지 모두 바람직하지 않다.
- ④ 운동의 종류나, 식사량 그리고 개인의 특성에 따라 식후 운동하기 전까지 기다려야 하는 시간이 다르다.
- ⑤ 적당한 양의 음식을 먹고 난 후 격렬한 운동을 할 때는 30분 정도만 기다리는 것이 좋다.

$$\begin{array}{r} 70 \\ \times 1.5 \\ \hline 350 \\ 1050 \\ \hline 105 \end{array}$$

14. 다음 글의 내용과 일치하지 않는 것은? [4.0점]

Space technology may not seem useful to the average person. But did you know that many of the items we use every day come from space technology? For example, the image sensors in modern cameras were originally developed to be used in space. However, they were easy to produce and didn't require much power, so companies started using them in commercial products. These days, an updated version of this technology can be found in many devices, including smartphones and video cameras. Freeze drying is another technology that was originally developed for use in space. Freeze-dried foods are long-lasting and easy to prepare. Now, however, freeze-dried foods such as soups and fruit can be found in your local market! These are just two examples of how space technology has benefited everyone. Look around you. What other common items do you think come from space technology?

- ① Many products we use in our daily lives actually originated from space technology.
- ② Image sensors in modern cameras were first created for space exploration, not for commercial use.
- ③ Camera image sensors became popular because they were easy to make and energy-efficient.
- ④ Freeze-drying technology was developed to make food last longer and be easier to prepare in space.
- ⑤ Although freeze-dried foods were used in space, they are still difficult to find in local markets today.

[15~18] 다음 빈칸에 들어갈 말로 가장 적절한 것을 고르시오.

15.

Many people excuse perfectionism at work by claiming it is professionalism. Differentiating between the two is useful. Managing perfectionism does not mean dropping critical standards. It becomes a problem when your personal expectations become unmanageable, self-imposed demands that create more pressure than is needed. It is not permission for work sloppiness or low standards; rather it means spending less time on tasks that do not need the level of input you are providing. What are the acceptable standards of professionalism in your work and how do these compare with your own? With the busyness of workplaces these days, trying to achieve a benchmark of 110% perfect on everything can be a recipe for _____. If you are a manager expecting this of others, you may be setting yourself up for failure. [3.6점]

- ① survival
- ② prejudice
- ③ conformity
- ④ exhaustion
- ⑤ enthusiasm

16.

Carbohydrates are the most important source of energy in a balanced daily diet. Carbohydrate intake must be balanced with adequate amounts of protein, fat, and water intake. In athletes, carbohydrates are the primary fuel source to maintain blood glucose for energy during exercise. Adequate carbohydrate intake also helps spare muscle from catabolic activity and muscle breakdown. After carbohydrates are consumed, they are broken down into smaller sugars that get absorbed and used as energy. The body is capable of storing excess carbohydrates in the form of glycogen in the muscles and liver. The body's glycogen capacity is approximately 300 to 400 grams. Subsequent excesses are then converted to fat and stored. Conversely, in the setting of inadequate intake, an energy imbalance can result in adverse effects on athletic performance as well as overall health. After all, _____. [4.2점]

*catabolic: 이화(異化)작용(에너지 생성 및 분자 분해 과정)의

- ① it all comes down to finding the sweet spot between excess and deficiency
- ② athletes should maximize their carbohydrate intake to store as much energy as possible
- ③ converting excess carbohydrates into fat serves as an efficient alternative for energy
- ④ a carbohydrate-centered diet is the best way to eliminate all dietary flaws and stay in good health
- ⑤ preventing muscle breakdown must be prioritized over maintaining stable blood glucose levels

17.

Knowledge about a product's country of origin can affect the way consumers think about it. Just as we stereotype people based on where they were born, we stereotype products based on where they were produced. Consumers in developing countries, for instance, often infer higher quality for brands perceived as foreign. Conversely, consumers in some nations believe their country's products are superior to those made elsewhere. Japanese consumers, for example, tend to infer that made-in-Japan products are higher quality than made-in-America products. Therefore, a luggage company markets its pricier luggage in Japan by stressing that the products are designed and made in Japan. Consumers are more likely to make inferences about a brand based on its country of origin when they are unmotivated to process brand information or when their processing goal guides attention towards origin information. If consumers dislike a country's political or social policies, they may _____.

- ① vote with their wallets
- ② follow the footsteps of others
- ③ get to the heart of the products
- ④ build a wall against new trends
- ⑤ close their eyes to the pricey tags

18.

Host I see. That makes sense. So, does that mean I should exercise on an empty stomach?

Dr. Hill No, it doesn't. That can also be harmful and unpleasant. This is because the body needs energy to exercise. The fuel that provides this energy is glycogen. Carbohydrates in the food that we eat are broken down into a kind of sugar called glucose. When this glucose is stored in parts of the body, such as the muscles and liver, it is called glycogen. This is why exercising on a completely empty stomach such as when you first wake up in the morning can be such a challenge. Your blood sugar levels are low, and you don't have enough glycogen storing in your body. If you exercise on an empty stomach, you will most likely lack energy and feel unusually tired. There can also be more serious outcomes. Some people end up suffering from nausea and headaches, and others even faint. This is because _____. [3.4점]

- ① breaking down glycogen into glucose is activated
- ② high blood pressure is caused by intense exercise
- ③ too much glucose is in your blood after eating food
- ④ intense exercise depletes all the glycogen in your muscles
- ⑤ a lot of exercise enables them to reduce weight effectively

[19~24] 다음 글을 읽고, 물음에 답하시오.

Fish Cheeks

(A)

I fell in love with the minister's son the winter I turned fourteen. He was not Chinese, but as white as Mary in the manger. For Christmas I prayed for this blond-haired boy, Robert, and a slim new American nose.

When I found out that my parents had invited the minister's family over for Christmas Eve dinner, I cried. What would Robert think of our ㉠ shabby Chinese Christmas? What would he think of our noisy Chinese relatives who lacked proper American manners? What terrible disappointment would he feel upon seeing not a roasted turkey and sweet potatoes but Chinese food?

(B)

At the end of the meal my father leaned back and belched loudly, thanking my mother for her fine cooking. "It's a polite Chinese custom to show you are satisfied," explained my father to our astonished guests. Robert was looking down at his plate with a ㉡ reddened face. The minister managed to muster up a quiet burp. I was stunned into silence for the rest of the night.

(C)

On Christmas Eve I saw that my mother had outdone herself in creating a ㉢ strange menu. She was pulling black veins out of the backs of fleshy prawns. The kitchen was littered with appalling mounds of raw food: A slimy rock cod with bulging eyes that pleaded not to be thrown into a pan of hot oil. Tofu, which looked like stacked wedges of rubbery white sponges. A bowl soaking dried fungus back to life. A plate of squid, their backs crisscrossed with knife markings so they resembled bicycle tires.

And then they arrived — the minister's family and all my relatives in a clamor of doorbells and crumpled Christmas packages. Robert grunted hello, and I pretended that he was not worthy of existence.

(D)

After everyone had gone, my mother said to me, "You want to be the same as American girls on the outside." She handed me an early gift. It was a miniskirt in beige tweed. "But inside you must always be Chinese. You must be proud you are different. ㉣ Your only shame is to have shame."

(E)

Dinner threw me deeper into ㉤ relief. My relatives licked the ends of their chopsticks and reached across the table, dipping them into the dozen or so plates of food. Robert and his family waited patiently for platters to be passed to them. My relatives murmured with pleasure when my mother brought out the whole steamed fish. Robert grimaced. Then my father poked his chopsticks just below the fish eye and plucked out the soft meat. "Amy, your favorite," he said, offering me the tender fish cheek. I wanted to disappear.

(F)

And even though I didn't agree with her then, I knew that she understood how much I had ㉥ suffered during the evening's dinner. It wasn't until many year later — long after I had gotten over my crush on Robert — that I was able to fully appreciate her lesson and the true purpose behind our particular menu. For Christmas Eve that year, she had chosen all my favorite foods.

19. 윗글의 (A)에서 드러나는 I의 심정으로 가장 적절한 것은? [4.0점]

- ① ☒ anxious ② relieved ③ delighted
④ ☐ outraged ⑤ grateful

20. 윗글의 주어진 (A)에 이어질 내용을 글의 흐름에 맞는 순서로 배열한 것으로 가장 적절한 것은? (단, (F)는 가장 마지막에 위치한다.) [4.0점]

24. 밑글의 제목인 'Fish Cheeks'의 상징적 의미로 가장 적절한 것은? [4.4점]

- ① Amy's Chinese identity, which she once felt ashamed of but later came to accept with pride
 ② Amy's painful memory of cultural shame, which remained unsolved and never led to self-acceptance
 ③ Amy's belief that being different from American girls was shameful and should be corrected through assimilation
 ④ Amy's cultural heritage, which she felt embarrassed about because it kept her from fitting in with American girls
 ⑤ Robert's growing respect for Amy's Chinese identity, which he came to understand through the Christmas Eve dinner

25. 주어진 글 다음에 이어질 글의 순서로 가장 적절한 것은? [4.4점]

Money loses value when inflation takes place; hence, those with large amounts of money encourage a strong government response to inflation. Governments respond by raising interest rates to discourage the creation of additional money through loans.

- (A) For people and businesses with outstanding loans, however, the increased cost that results can be disastrous. Increased expenses and bankruptcies lead to job loss, and consequently, more people unable to pay for their homes, cars and other loans.
 (B) As other loans are paid back, with fewer people taking out new loans due to the policies, money disappears from circulation, reducing the ability of people to buy things and, thereby, reducing the inflationary pressure.
 (C) This leads to another round of defaults and subsequent contraction in the money supply. This remedy for inflation may bring as much or more hardship than the inflation, but the hardship falls on people with little power to influence policy

- ① (A) - (C) - (B) ② (B) - (A) - (C)
 ③ (B) - (C) - (A) ④ (C) - (A) - (B)
 ⑤ (C) - (B) - (A)

26. 다음 글의 내용을 한 문장으로 요약하려 한다. 빈칸 (A), (B)에 들어갈 말로 가장 적절한 것은? [4.2점]

Forecasters who predict resource depletion often ignore the power of markets. For example, some forecasters use a current reserve index to estimate how long a resource would last. The current reserve index divides the current known reserve of a resource by the amount currently used each period. So, if we know of 445 billion barrels of oil, and we are currently using 15 billion barrels per year, the index indicates that we will run out of oil in about 30 years. Some studies, like the Limits to Growth, further assume that demand will increase each year, thus depleting resources even faster. But what they fail to see is that if markets are allowed to do their usual duty, that is, prices rise as depletion occurs, resources will last much longer.

Forecasters of resource depletion often (A) market mechanisms, failing to recognize that rising prices driven by scarcity naturally (B) a resource's lifespan.
